DETAILED ACTION

1. Claims 19-37 are presented for examination. Claims 1-18 canceled.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tina Gonka on August 24, 2010.

The application has been amended as follows:

Delete claim 19 and replace with

- 19. A method for operating an industrial installation, comprising:
- using a computer system including a computer with a system memory and a plurality of modules;
- identifying a plurality of technical measurement variables which co-determine a value retention of a real installation by a first module of the computer;
- recording an actual status of the real installation by measuring the identified technical measurement variables, the actual status of the identified technical measurement variables being input into the computer via an inputting device;
- specifying a benchmark and storing the specified benchmark in the computer;
- comparing the actual status of the real installation with the specified benchmark to

determine a technical measurement variable whose change in value increases the value retention of the real installation by a second module of the computer;

identifying a plurality of structural measures which increase the value retention of the real installation by changing the value of the technical measurement variable by a third module of the computer; and

carrying out the structural measures.--;

Claim 24, line 2, delete "in a" replace --for--;

Claim 34, delete line 1-3, and replace with --A non-transitory computer readable storage medium storing a computer program which executed by a computer system, performs a method for an industrial installation, the computer program----;

Allowable Subject Matter

3. Claims **19-37** are allowed.

The following is an examiner's statement of reasons for allowance:

The allowability of the independent claims resides, at least in part, in that closest prior art of record '**Friedrich et al. (US 6,718,215)**' does not disclose or suggest, alone or in combination, recording an actual status of the real installation by measuring the identified technical measurement variables, the actual status of the identified technical measurement variables being input into the computer via an inputting device;

specifying a benchmark and storing the specified benchmark in the computer; comparing the actual status of the real installation with the specified benchmark to

determine a technical measurement variable whose change in value increases the value retention of the real installation by a second module of the computer;
identifying a plurality of structural measures which increase the value retention of the real installation by changing the value of the technical measurement variable by a third module of the computer, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
